Level Best Is Precision Grading. It's All We Do.

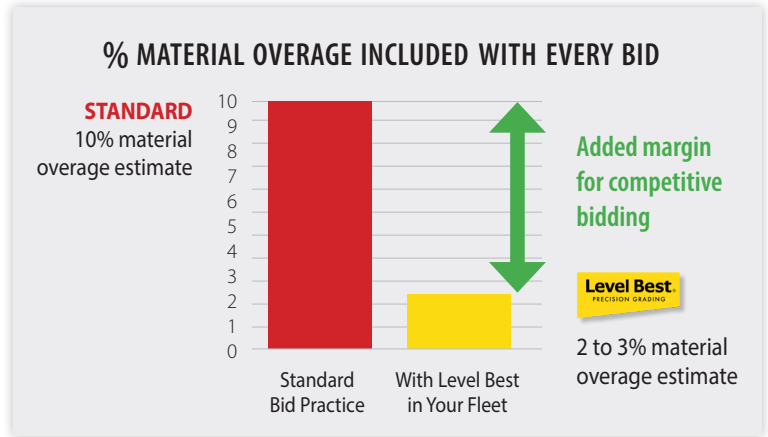

There's *Rough Grade*, *Finish Grade*, *Final Grade*, and now there's *Precision Grade* – the one that makes you money. But only with Level Best.

How Precision Grading Pays You Back

Makes sense. A more precise grade reduces gravel and concrete cost. Standard 10% overage estimates can be reduced to 2 or 3% with Level Best.

The better the bid, the more contracts you win.

Do the math. Level Best gives you a clear business edge. But that's just the beginning.

“We Use Nothing Else.”

Level Best Precision Graders have a loyal following. Savvy contractors who need accuracy, smooth operation, durability, and ease of use rely on Level Best, the recognized leader in product design and technical support for Precision Grading attachments.

UNIVERSAL COMPATIBILITY

“Mix-and-match” a Level Best Precision Grader with any combination of CTL or skid steer with any machine guidance system.

NO DAILY MAINTENANCE

Other units have over a dozen grease zerks that need attention before every use. That can take from 10 to 30 minutes of production downtime every workday. No daily maintenance with Level Best.

FASTER, MORE ACCURATE, SMOOTHER

Level Best is the fastest way to get a consistent, precisely graded surface. Operators love the smooth operation; they don't get tired and get more done because a Level Best is so comfortable.

UNRIVALED FLEXIBILITY

Learning how to use Level Best systems is fast and easy. Even entry level operators can be producing in hours, not weeks. And matching a Level Best with existing equipment is a snap.

EXPERT DEALER SUPPORT

Nobody knows Precision Grading like Level Best, originators and experts in Precision Grading. Online help resources are readily available. Plus, in a pinch a real expert is available by phone.
