

# Leica **mojoMINI**

field and street navigation

## Get a smarter lightbar And start saving with the Leica **mojoMINI**

Getting started in precision guidance has never been easier. It's more affordable than ever to start saving money in the field by lowering input costs and by enhancing driver accuracy to reduce overlap in any field operation. Plus, with Leica's revolutionary steer-to-the-line technology, the **mojoMINI** helps operators maintain a straighter, more consistent line every time.

**NEW!** Save even more with the Leica **mojoMINI's** new features

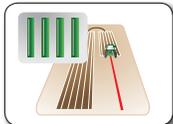

Reduce waste and unnecessary expense with the new **Boundary Recording** feature. You can quickly and easily calculate the total area of a field to accurately determine input requirements.

Reduce over application and waste with the new **Coverage Mapping** feature. It allows operators to more accurately turn sections on and off as they enter headlands or cross other worked sections of the field. Plus, you'll see where you've been to ensure the field has been fully covered.

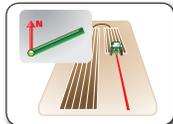

Finally, save time with the new **Continue Field** feature. If you stop for weather or to refuel, you can rest easy knowing that your current job is saved. You'll know where to resume your job and see exactly what ground you've covered.

Because the Leica **mojoMINI** comes with four standard guidance patterns, it can be used in a wide variety of field shapes.

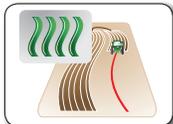

■ AB Parallel

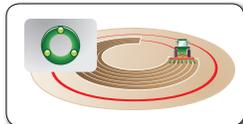

■ A+ Heading

■ Fixed Contour

■ Pivots

### lightbar guidance + street navigation

#### In the field or on the go

Don't settle for a standard lightbar system that just sits idle when you aren't in the field. Instead, buy a solution that will get used in the field and on the go – with turn-by-turn street navigation.

The Leica **mojoMINI** comes with high-quality street navigation software featuring 3D graphics. The system's voice commands and lane-assistance technology will keep you headed in the right direction, while the system's cutting-edge routing and direction-finding capabilities help you get anywhere you need to go quickly.

- when it has to be **right**

## GeoSpective smart antenna

The Leica mojoMINI kit comes with the value-added Leica GeoSpective smart antenna featuring GLIDE™ technology for a smooth, accurate pass-to-pass signal without needing any external corrections or expensive subscriptions.

The Leica GeoSpective works seamlessly with the mojoMINI, but also provides added value beyond the mojoMINI kit.

The smart antenna's integrated Bluetooth® technology allows easy connection to both the mojoMINI display and other handheld PDA devices. Plus, with the optional expansion cable, you can use the GeoSpective smart antenna to provide GPS connection to a wide range of precision-farming equipment, including rate controllers and yield monitors.

**Get more for your money with the Leica GeoSpective smart antenna, included in the Leica mojoMINI kit.**

## Small in size, but big in features

The Leica mojoMINI is compact and quick to install in the cab or in the car, but it's also packed with a lot of features, which make it the most versatile lightbar system on the market.

### Features and Specifications

#### Leica mojoMINI

- 4.3 inch color, touch-screen display
- Built-in speaker
- 12-24 volt operation
- Built-in rechargeable battery delivering about 2 hours of portable use
- Built-in GPS receiver for street navigation
- Built-in calculator

#### Leica GeoSpective

- 12-24 volt operation
- 14 channel L1 GPS
- SBAS (for WAAS, EGNOS, etc.)
- GLIDE™ for enhanced pass-to-pass accuracy
- Pass-to-pass accuracy 15-20 cm (6-8 inch) (Measured over 15 minutes)
- 5 metre/15 foot power cable
- Magnetic or adhesive mount

#### Street Guidance

- Turn-by-turn guidance
- Text-to-speech spoken street names (not available in all languages)

- Search for address by city, street or postcode
- 3D, 2D heading up, and 2D north up view modes

#### Field Guidance

- **NEW!** Boundary Recording
- **NEW!** Coverage Mapping
- **NEW!** Continue Field
- Automatic Bluetooth® connection to the Leica GeoSpective receiver
- Multiple guidance options
  - AB Parallel guidance
  - A+ Heading guidance
  - Fixed Contour guidance
  - Pivot guidance
- 3D perspective guidance view
- On-screen lightbar
- Day and night operation modes
- Displays receiver positioning quality
- Enter line spacing in feet and inches or meters
- Speed readout in mph or km/hr

### Available accuracies and satellite constellations
